Occupancy % by Day

## Revenue:

**Total Revenue:** **1.69 billions** across all properties.

Highest revenue generating property : AtliQ Exotica

Lowest revenue generating property : AtliQ Seasons

## Revenue by Property and City:

Mumbai is the top revenue-generating city with 661M, followed by Bangalore (415M) and Hyderabad (321M).

**Revenue by Room Class:** Premium (32.81%) and Elite(27.04%) dominates.

## Occupancy:

. **Overall Occupancy:** **57.79%** which means that nearly **42%** of available rooms remain unoccupied.

. For a hospitality business, maximizing occupancy is critical to increasing revenue.

## Insights:

. Cities like **Bangalore (55.68%)** have lower-than-average occupancy, pulling down overall performance.

. **Occupancy Trends by Month and City:** Occupancy fluctuates between 55-60% from May to July, with noticeable dips and peaks during certain weeks.

## Insights:

. While some properties perform very well, others lag behind, indicating inconsistent revenue generation across cities and properties.

. **Mumbai** generates the highest revenue overall, which suggests the market is strong but may have opportunities for better optimization across properties.

## Recommendations:

. **Benchmarking Best Performers:** Look at the best-performing properties (like Atliq Exotica) and analyze what strategies or factors lead to their success (e.g., pricing strategy, customer base, services offered, etc.). Use these as benchmarks to improve other properties.

. **Tailored Marketing by City:** Create marketing plans that fit the specific needs of each city, like **Mumbai** and **Bangalore**.

## Recommendations:

. **Seasonal Promotions:** To boost occupancy during low-demand periods, Atliq Hospitality could introduce discounts, special weekend packages, or holiday-specific offers to attract more guest.

. Target low occupancy cities with regional marketing campaigns.

## ADR & RevPAR Insights :

- . ADR : 12.70K (Bangalore highest at 15K).
- . RevPAR : 7.34K (Mumbai leads at 9K, Hyderabad lags at 5K).
- . Here ADR is almost constant .It indicates that the hotel or property is keeping its room pricing stable over a given period.

### Recommendations:

- . **Implement Dynamic Pricing:** Implement dynamic pricing strategies that adjust rates based on demand patterns, competitor pricing, and guest behavior.
- . **Seasonal Pricing:** Identify peak seasons and increase rates accordingly.
- . **Secure partnerships with business** to attract more high-paying corporate travelers during low seasons.

## Realization & Cancellations :

- . Realization rate: 70.14%.
- . Cancellation rate: 24-26%, with notable spikes.

### Insights:

- . Spikes in cancellations are seen at certain times, often close to the booking date, reducing re-sell opportunities.

### Recommendations:

- . **Flexible Policies:** Offer non-refundable booking discounts or stricter policies during peak periods to lower cancellations.

**Rebooking Offers:** Provide discounted last-minute deals to fill canceled rooms quickly.

## Booking Platforms :

- Top Platforms : 'Others' and 'MakeyourTrip'

Underperformance : Direct channels.

### Insights:

- . Some booking platforms, such as "**logtrip**" and "**makeyourtrip**", have a higher realization percentage, while direct channels (offline/online) have lower performance.
- . This suggests that reliance on third-party platforms might be driving higher realization but reducing the overall margin due to platform fees.
- . Increase direct bookings with loyalty programs and exclusive deals.
- . Focus on high-performing platforms while improving low performers.
- . Highest booking is done from other source. so need to identify other source for marketing purpose.
